- Notes:
1. MCL - Maximum Contaminant Level - US EPA Maximum Contaminant Level for groundwater (7/02).
  2. RBC - US EPA Region III Risk-Based Concentration for tap water (October 2004).
  3. NS - Indicates no established criteria.
  4. Analytical results are presented for all compounds detected in samples from a particular monitoring well location.
  5. Blank spaces in the analytical result tables indicate that the parameter was not analyzed.
  6. Monitoring wells which are shaded indicate that it was not sampled in 2004.

Qualifiers

U - Analyte was not detected above the indicated detection limit.

J - The reported concentration for this value may not be accurate or precise.

UJ - Analyte was not detected, the indicated detection limit may not be accurate or precise.

L - Analyte present. Reported value may be biased low. Actual value is expected to be higher.

UL - Analyte was not detected, the indicated detection limit may be biased low.

B - Not detected substantially above the levels reported in the field or laboratory blanks.

R - Result is rejected.

D - Compound quantitated on a diluted sample.

E - Concentration exceeds the calibration range of the instrument.

K - Analyte present. Reported value may be biased high.
